Response to Amendment

1. The After Final Amendment filed on February 17, 2009 has been fully considered and entered. However due to the discovery of a potential double patenting rejection a new office action is being issued.

Note: Independent claims 1, 13, 19, and 30 are allowable over the prior art as amended. Claim 25 would be allowable if similar limitations included in the above independent claims are added.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed.

Art Unit: 2456

Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

A question of patentability is raised with respect to claims 1-5 and 7-34 of the instant application under the judicially created doctrine of “obviousness-type” double patenting with respect to claims 1-29 of U.S. Patent No. 7,454,483 and claims 1-32 U.S. Patent No. 7,231,377.

Claims 1-5 and 7-34 of the instant application are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 7,454,483 and claims 1-32 of U.S. Patent No. 7,231,377.

Art Unit: 2456

Although the conflicting claims are not identical, they are not patentably distinct from each other because a comparison between claims 1-5 and 7-34 of the instant application and claims 1-29 of U.S. Patent No. 7,454,483 and claims 1-32 of U.S. Patent No. 7,231,377 seem to be directed to the same invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
